Sprint Planning - Automating Standard Laptop Orders (ServiceNow)

A Sprint is a fixed period or duration in which a team works to complete a set of tasks.

An **Epic** is a **big task or project** that is too large to complete in one sprint. It is broken down into **smaller tasks (stories)** that can be completed over multiple sprints.

A **Story** is a small task. It is part of an **Epic**.

A **Story Point** is a number that represents how much effort a story takes to complete (usually in the form of the Fibonacci series).

1 - Very easy task
2 - Normal task
3 - Moderate task
5 - Difficult task

Story Points - 5 (1, 2, 3, 5)

Sprint 1

Data Collection (Epic 1)

Gathering Laptop Request Data (USN1) 2

Loading Data into ServiceNow Tables (USN2) 1

Data Preparation (Epic 2)

Handling Missing Cost Centers (USN3) 3

Creating Fields for Dates and Costs (USN4) 3

Handling Inconsistency in Request Data (USN5) 3

Total Story Points in Sprint 1 = 2+1+3+3+3 = 12

Sprint 2

Report Development (Epic 3)

Requests by Status Chart (USN6) 2

Average Turnaround Time Chart (USN7) 2

Automated vs Manual Requests Chart (USN8) 2

Cost Savings Report (USN9) 4

Dashboard (Epic 4)

Developing Dashboard (USN10) 5

Report Design (Epic 5)

Developing Report for Request Volume, Vendor Delivery Time and Stock Level (USN11) 5

Total Story Points in Sprint 2 = 2+2+2+4+5+5 = 20

Total Story Points

Sprint 1 = 12

Sprint 2 = 20

Velocity = Total Story Points Completed / Number of Sprints

Total Story Points = 12 + 20 = 32

Number of Sprints = 2

Velocity = 32 / 2 = 16 (Story Points per Sprint)

Your team's velocity is 16 Story Points per Sprint.

Implementation Screenshots (ServiceNow)

Captured from the project demo video (Flow Designer build and a test laptop request).
